

STUDENT ACTIVITY REPORT

<i>Student's Name</i>	Suraj Mundhada
<i>Branch</i>	DESH - Department of Engineering Sciences and Humanities
<i>Division</i>	FY - Q
<i>Email</i>	mundhada.suraj231@vit.edu
<i>GR No.</i>	12311372
<i>Gender</i>	Male
<i>Guardian</i>	not_assigned
<i>Coordinator</i>	Tejas Hatedikar
<i>Academic Year</i>	2023-2024
<i>Registered Semester</i>	1

<i>Name of the Activity:</i>	Go Green
<i>Objective of Activity</i>	Go green has a clear vision that it is trying to work towards cleaner environment that everybody needs in order to have a healthy mother earth. They help organisations through providing volunteers whenever needed like we worked for tree plantation. Also they look in various areas like health sector also they look after animals like we did in one of our assignment we made a bird feeder which would help birds to find food easily in our college area. So basically they try to improve our environment to ensure a better future for all of us. Also it is a non profit organisation and completely made for the benefit of our own mother earth's future. They plant a lot of trees and not only this they also provide the trees water regularly until it becomes a big tree. Also go green does cleanliness drives to make sure there is no garbage in our locality so that we are safe from diseases caused by them.
<i>Description of Activity</i>	Go green in our college is a club in which all the students who feel like making a better future for all work towards making the world a better place to live. They plant a lot of trees in their tree plantation drive. Also they do many other different activities which helps students learn more about environment problems and also shows us what small steps we could take easily which would later turn into a big milestone and help our environment to be more healthy. So yeah this is go green for you it's a club which does social work. This is also a international club which aims to minimise pollution. They promote many various issues like reusing plastic bags which we bought once also they promote recycling, saving water and reducing waste and also maintaining cleanliness. The goal is making our planet more green and ensure a sustainable future for coming generations.

STUDENT ACTIVITY REPORT

<p><i>Benefits to Society</i></p>	<p>The society is benefitted a lot through the work done by go green volunteers and coordinators as they are basically trying that through the work they do the society gets benefitted like plantation of trees benefits society as the oxygen level increases,carbon dioxide level decrease also the earth becomes more greener. Also it is making a social message that would lead to a more informed and conscious society. It also helps to protect biodiversity by preserving various natural land. Also as go green reduces air and water pollution it leads to lower respiratory diseases,allergies and other health issues. Also by doing this activities overall carbon emission reduces which also helps to protect ozone layer which protects us from harmful UV rays. Also as we try to reduce garbage and recycle it helps to reduce strain on landfills. So go green benefits society by promoting healthy and cleaner environment.</p>
<p><i>Benefits to Self</i></p>	<p>Go green provides our own self a better person than earlier as we are now very much aware of the decisions we make in our lives and we know how the environment is gonna affect from it so we are more conscious and we are now gonna make healthier choices such as eating good healthy food also reducing carbon footprint through action like using public transport rather than our own vehicles and also to walk or use cycle if the distance is small. Also it gives us personal fulfillment that we are a part of such a wonderful process. Now we are more of a community person who cares about the whole community and we would meet such like minded people there.By going green we can improve the quality of our life by providing us gardens and many other green spaces for recreation also as garden has plenty of trees we get fresh air. And also by using eco friendly products leads to healthier earth for you and your family.</p>
<p><i>Learning, Experiences, Challenges, that you would like to share</i></p>	<p>Go green club gave me many experiences which I would cherish for my life they are firstly making paper bags with my friends we all sat and made paper bags for local shopkeepers and distributed them among shopkeepers so that they could use it for the customers who would come later also after that we made a poster on go green which gave a wonderful message. Also in one activity we made a bird feeder from a plastic bottle so that birds can eat food from it if we put bird's food into it. Then on one activity we painted tree from a thick liquid which protect's tree from fungal attacks. Then three times we went to a location to plant trees with a organisation where we learned a lot that how to plant trees what ingredients and in how much quantity they are used so that in future we ourselves can plant trees in our locality. It also made us feel a little better about ourselves that we are also contributing a little for our society.</p>

STUDENT ACTIVITY REPORT

<i>How did it help to shape your Empathy</i>	<p>Go green really helped a lot to understand different views of the society and it actually shaped our empathy and felt that we made a difference by our work, which we surely did. As we did many different works like tree plantation, tree painting, making a bird feeder also making paper bags and distributing them among local shopkeepers who sometimes use plastic bags instead I felt this little things will eventually become big and help a lot to our mother earth. And also when we planted so many trees and helped the foundation with whom we were collaborated with, we understood that we are planting trees for our own better future and not doing it as a favour for anybody else as there will be more greenery later and there will be no deficiency of oxygen so we can live a more better life. Also one day a man from United States joined us and shared his life experiences with us and motivated us to maintain cleanliness.</p>
